HACKATHON 3
DAY 01

Step ①
- Marketplace Type:-
GENERAL E-Commerce

I want to create an E-Commerce brand that provide's tech Gadget's and tech Service's so that people can order these current tech item's sitting at home. I want to create current AI Gadget's and other Tech Serviices. that are Completly new in the market and Launch my own brand and create my own campany that provide's them with services and is something new in the market.

STEP ② Bussiness Goals:-

*What Problem does your Marketplace Aim to Solve

i will either make and sell the other campany AI-Gadgels or I will sell the gadgets that are being my own Campany. Gadget will be like; Electronic AI-Data Pen, Electronic AI-Boards, Electric Cycle and fined the Robot on Fixed subject and other such things that aren based on current technology.

* Who is Your Target Audience?

My Audience should be interested in "Technology", no matter what group they in. But if they are between "16" to "35"; their mind set is very strong on delivering good things so they can do it all and improve they work.

* What Products or Services will you offer.

I retweet some of the things that are currently in the markit such as markit smart and powerful strong senser cameis that cover the body of motion.; 3D Model's like Metaverse "glasses" that let you enjoy real libe experience in 3D Model's. ; and Something is new that takes care of your life and Health and if you don't do it some one will punish you thing hand band devices it should have A.I Data and senseric Power keep you active in some way and thing like that..

* What will set Your Marketplace?
• SPEED:-

We will do ghost fast delivery which will alive in 1 to 2 Day because this is Electronic Gadgets ensuring quick acess to essential.

Market RESEARCH :-

I have done a lot of research on an e-commerce and this is what I have found. There is no such E-Commerce site in the market that provides both teach services and tech Gadgets, be it small Gadgets or big Gadgets, and this application will be sucessfull

- ## AFFORDABILITY :-

It Depend's on which product you are buying, but our prices will be affordable and there will be various deal's, so the price will "Go" & "UP" and "DOWN"

- ## Customization :-

You can also customize your own product, let us know in the description if we are creating a Gadget for that product, and we will add the some features of your choice.

STEP ③ Create Data Schema :-

[Product] Description
Fields   Cost per unit
- Price —
- ID ——> Unique Identifier
- Name ——> Name of the Product
- Description —> Product short details.
